

use. Too much acid in the blood or urine (ketoacidosis) and severe urinary tract infections (UTIs) have happened. Ketoacidosis can be deadly. Both of these may need to be treated in a hospital. It may be harder to control blood sugar during times of stress such as fever, infection, injury, or surgery. A change in physical activity, exercise, or diet may also affect blood sugar. This drug may raise the chance of a broken bone. Talk with the doctor. Kidney problems have happened. Sometimes, these may need to be treated in the hospital or with dialysis. A rare but very bad infection has happened with drugs like this one. This infection may be deadly. Get medical help right away if your genitals or the area between your genitals and rectum becomes tender, red, or swollen, and you have a fever or do not feel well. If you are 65 or older, use this drug with care.

KEEP OUT OF REACH OF CHILDREN: STORE IN SAFETY CONTAINER OR SECURE AREA.
